- Specified and installed furniture

FUNCTIONAL DETAILS

- Exceed expectations for both specification and installation abilities.
- Create a modern, visually appealing, yet functional space

MBA HEALTHGROUP in South Burlington, Vermont offers physicians both in private practices and hospitals multiple solutions for practice management and electronic health record solutions. MBA HealthGroup recently moved to a new location and were looking to purchase new furniture that could be incorporated with their existing furniture.

Exterus Business Furniture provided CAD layouts for all areas using both their existing furniture and new furniture to complete the space. For their open office area, Exterus utilized their existing 12 Hon Initiate workstations and ordered new product to create the 16 workstations needed for their new location. MBA HealthGroup also required 4 workstations for their E.H.R. Team and desired a high-tech look for this area while still remaining consistent with the general design scheme. Hon Initiate workstations were used with black finishes and lower panels with glass to provide a clean, modern feel.

MBA HealthGroup also needed new furniture for 5 private offices and Exterus determined that Hon Park Avenue laminate series furniture would be a perfect fit. This provided a nice contemporary appearance to compliment their new space.

Furnishings for a new streamlined training/conference room was also a necessity for the client. A Mayline 18 foot conference table with technology capabilities was chosen for this space. Hon Alaris seating was chosen for the chairs around the conference table for everyday use. Additional seating included Hon Pagoda guest chairs.

The end result fit with the client's expectations and all parties involved were pleased with the project.

People you know, Experience you can trust!
